Subject: California Proposition 65 Notice

Morrison Bros. Co. (MBC) has recently been made aware of several MBC products being made available “online” and/or through retail outlets in the state of California. California’s Proposition 65 requires formal, public notice through proper warning labels for individual items, such as the one shown below, and MBC will immediately begin including warning labels for products that contain brass.

 **WARNING:** This product can expose you to chemicals including lead which is known to the state of California to cause cancer and birth defects or other reproductive harm. For more information go to www.p65warnings.ca.gov

MBC products are not intended for applications involving potable water or any form of human or animal consumption. They are designed and manufactured exclusively for use in fuel and chemical handling. The Morrison catalog and product specification sheets include the materials of construction. Please take necessary precautions when designing systems, specifying products, and selling these products. If you have any questions on an application, contact MBC immediately.

MBC products are sold exclusively through authorized distributors. Distributors are trained and kept aware of product specifications, applications, and regulatory status. MBC cannot control the retail sales and end use of the products, but will immediately send notice, such as this, to distributors when the company is made aware of any situation in the field. It is important to read and understand the notice, comply with the warnings, and take corrective action when necessary in cases involving noncompliance.

Thank you for your attention. If you have any questions or concerns or require warning labels for brass MBC products in your inventory that you plan on selling into California, please contact Morrison Bros. Co. at (800) 553-4840 or via email at custserv@morbros.com.

Yours truly,

Rick Zillig
Manager QCCS
